The Institute of Medical Psychology of the Otto-v.-Guericke University Magdeburg/Germany is seeking candidates for two positions in the fields of

Neuropsychology/Cognitive Neuroscience

- 1. Research Scientist (full-time, TVL13)**
- 2. PhD-student position**

to direct and carry out research on brain plasticity and rehabilitation/psychotherapy and teaching medical students in the German language. The research scientist will assume the role of a group leader and will supervise two technician and currently three doctoral students. The position is initially available for 3-years with a possibility of an extension.

We are an interdisciplinary and international team of psychologists, biologists and software engineers working in an exciting field of brain plasticity aimed at treating visual impairment and blindness by means of vision training and non-invasive brain stimulation to enhance residual functions. We offer a cooperative and productive working environment and provide support for continued education, participation in international conferences and research cooperation with national and international collaborators.

Your qualifications:

Research Scientist: You have a PhD or equivalent in Psychology / (cognitive) neuroscience or related field and are able to teach in German language and supervise PhD- and MD-students in psychology, cognitive neuroscience or related fields; you have prior experience in publishing, are able to work independently, and have a burning desire to succeed.

PhD-student: You have a Diploma/Masters degree in psychology, (cognitive) neuroscience or comparable field and are able to participate in some teaching obligations in basic medical psychology. The position offers the opportunity to work towards a PhD or MD.

Send applications to Prof. Bernhard A. Sabel at: imp@med.ovgu.de
