

Student Research Assistant job opening (to be filled immediately)

In our Synapse – Brain – Cognition group at LIN we look for a highly motivated student with previous lab experience who would like to help us in a project about age-dependent changes in the Extracellular Matrix (ECM) of the brain.

Depending on the individual interests and talents of the candidate, the following methods could be applied:

- Analysis of mouse behaviour
- Protein biochemistry (SDS-PAGE and immunoblots)
- Immunohistochemistry and analysis (ImageJ Fiji)

We welcome individuals who are committed to science and who already bring some experience in at least one of the above mentioned methods.

We offer a great working environment, supervision and mentoring, interesting tasks, flexible working hours and payment according to tariff. Contract duration and number of working hours per month can be individually adjusted.

When desired, the job project could be a starting point for a Master thesis in our lab.

Please contact us via jana.schulze@lin-magdeburg.de or Constanze.seidenbecher@lin-magdeburg.de for further information.
